

Super High Head Dewatering Pump from Pumpex

Pumpex new Super High Head Submersible Dewatering Pump, **P3001 SH**, a robust two-stage drainage pumps which combines high wear resistance with simple service and low weight, is **now available also in 60 Hz**.

The new P3001SH is made for the toughest applications at construction sites, in mines, for tunneling jobs etc. where easy handling, safety and reliability is crucial

The main advantages of Pumpex new **P3001 SH** are:

- Extremely high head, up to **95 meters**
- **High Wear Resistance** with hard impellers and polyurethane wear parts.
- **Simple maintenance** by external plugs for oil and motor inspection
- **Safe and fast service**. No adjustments needed. All parts have fixed positions for reliable operation and maintained efficiency.
- **Easy Handling** by low weight and plug-in start with built-in motor protection.

Pumpex new Drainage Pump P3001 SH is available in 11 kW 60Hz and 9,4 kW 50Hz

Pumpex drainage pump series ranges from 1 kW to 70 kW, all featuring easy to service and maintenance due to their modular design.

PUMPEX, founded 1968, is one the world's leading manufacturers of professional dewatering pumps with an installed base of more than 100 000 pumps in over 70 countries. High reliability combined with excellent serviceability results in pumps with unrivalled operating economy.
